

The LevelOne FEU-0812 is a wire-speed, non-blocking networking device that provides 8 ports of 10/100 Mbps Ethernet connections. All ports support auto-negotiation and auto-MDI/MDIX sensing, eliminating the need for crossover cables or Uplink Ports. Each port can be used as a general network port or as a connecting port into a router, server, hub, or another network switch.

PRODUCT INFORMATION

MAIN FEATURES

- Provision of flexibility for the 8 ports 10/100BASE-TX
- 10/100Mbit/s, Full-Duplex/Half-Duplex, auto-negotiation Automatic MDI/MDIX
- Quick and simple installation
- Support for self-learning and aging of 1K MAC addresses
- Easy ready-to-use installation

FEATURES

General	8 × 10/100Mbps
---------	----------------

PERFORMANCES

Packet transfer rate	148800pps
----------------------	-----------

PHYSICAL SPECIFICATIONS

Dimensions (L x W x H mm)	89*86*23mm
---------------------------	------------

SYSTEM FEATURES

Normes	IEEE802.3(10BASE-T), IEEE802.3u(100BASE-T), IEEE802.3az Energy Efficient Ethernet
Indicateur:	Power, LINK/ACT
Méthode de transmission:	Store- forward
Entrée d'alimentation:	1.6Gbps
Tableau d'adresses MAC:	1K
Storage temperature (°C):	0-40°C
Almacenamiento humedad (sin condensación):	10%~90%

Order information	FEU-0812
-------------------	----------

Packaging content	FEU-0812 Power Adapter Quick Installation Guide
